

# Hydrographic Shroud Patterns

Trusted Solutions,  
Passionate People

Your chair... Your style!

Invacare power wheelchairs offer the ultimate combination of performance, style and power designed to deliver a superior driving experience. We are continually developing our products to ensure your chair exceeds all of your expectations!

Our latest innovation is for YOU to be in control of how your chair looks - your choice, for your individual personality!

Using the latest technology available, 'Hydro Dipping', or Hydrographics, is the process of transferring a pattern or design to any non-porous object.

The hydrographic process can be applied to any plastic shrouding. You can therefore use this process to customise just about any part of your Invacare power wheelchair; making it stand out to be original and unique to you.

There are a wide range of designs and styles available to suit all preferences as displayed. To personalise your Invacare wheelchair with any of these, or, if you'd like to request something specific, please contact our specials department who will be able to advise and guide you through the process.
