Invacare® | Aero-tech cushions

The Invacare Aero-tech air cushions are specifically designed for those considered to be at 'Very High Risk' of developing pressure ulcers.

The continual movement of air through the cushions offers protection for the ischial tuberosities and coccyx area, while providing an infinitely adjustable, low friction and low shear environment to protect those clients that are vulnerable to pressure damage.

"..if you are looking for a functional, adjustable and extremely economical air cushion then Aero-tech is an excellent choice!"

Available as either a 4 valve (Aero-tech 4) or single valve (Aero-tech Uno), if you are looking for a functional, adjustable and extremely economical air cushion then Aero-tech is the product of choice of healthcare professionals.
