# Your simple guide to **Motability** Scooters and Power wheelchairs

## How does **Motability** work?

**Motability** is a national charity that raises funds and provides financial assistance to enable you to fund the mobility solution you need. The Motability scheme allows you to lease a Scooter or Powered Wheelchair using their Government funded mobility allowance.

Joining the Motability scheme not only helps you obtain the mobility product of choice but also provides you with confidence in the support you require to keep mobile and independent. The lease will include:

- A brand new scooter or powered wheelchair every three years that can be selected from our broad range of products.
- Excellent support from a fully trained, specialist Motability dealer. This support includes; assessment, maintenance and repairs.
- Insurance against an accident, damage or theft of the product.

## What information is required before you can order a **Scooter** or a **Powered Wheelchair**?

In order to ensure the product selected is the most suitable for your needs, a small amount of information is required, such as:

- Your height and weight
- How far you will travel on your scooter or powered wheelchair
- If there are hills in your local area that you will regularly travel up and down
- If you will use the product around your home
- If you are likely to carry much shopping on your scooter
- If you want to transport the product in a car
- How much space you have to store the product

## Mobility products explained...

### Why choose a mobility Scooter?

A mobility scooter is probably the product of choice if you can travel relatively independently, mount and dismount the scooter on your own and are capable of using a “bicycle handlebar” style steering column, or tiller. Scooters come in three different styles/sizes:

#### Small scooters

These scooters are light and easy to transport. They can be easily dismantled for either transporting in a car boot or for storage. Due to being smaller in size and lighter in weight, these types of scooter often have lower maximum occupant weight and a relatively lower driving range.

#### Medium scooters

Able to travel at speeds up to 6mph, medium scooters are capable of a higher maximum occupant weight, a longer driving range and are generally more durable. They're not as suitable for dismantling or transportation in a car boot.

#### Large scooters

Large scooters offer an increased range and an improved drive performance over rougher, more demanding terrain. Capable of speeds up to 8mph, they have a higher occupant weight and often a large selection of seat sizes. Due to their size must be stored in a larger, lockable area. Large scooters must be road taxed to be driven on public roads – this is provided free by the DVLA.

## Mobility products explained...

### Why choose a Powered Wheelchair?

A powered wheelchair might be a more suitable mobility solution if you need to remain in your chair for long periods of time, have limited or restricted movement in one or both of your hands, require mobility assistance around the home or if you are unable to transfer on or off a seat easily.

Powered wheelchairs on the scheme come in two main categories – Standard or Standard Plus.

#### Standard Powered Wheelchairs

These will come fitted with standard seating systems, standard controls and can often fold or be dismantled for transportation purposes.

#### Standard Plus Powered Wheelchairs

Based around the same platforms as the standard products, **Standard Plus** offer a number of accessories and adaptations to better suit a wider range of needs. Standard Plus offer a more unique build of product for your individual needs.

#### CUSTOM-BUILT Powered Wheelchairs

If you require further adaptations to your chair than those available, custom-built powered wheelchairs allow you to have various modifications and adaptations that mean your powered wheelchair is tailored to your needs. Often the technology involved is very advanced and can mean even if you have very limited movement you can still enjoy freedom and independence. If you find that standard powered wheelchairs do not suit your needs please speak to a specialist custom-built powered wheelchair Motability dealer. This will enable you to gather information and advice from health professionals about the option of having your powered wheelchair custom built.

## Invacare Scooters on the scheme

### Colibri – Small scooter

The Invacare® Colibri is a stylish, simple and colourful lightweight scooter, designed for those who enjoy a totally independent lifestyle. Thanks to the unique Invacare® LiteLock™ system the scooter can be taken apart easily without the need for tools and fits neatly into any car boot.

### Leo –Medium scooter

Safety is a key feature of the Invacare® Leo, but this does not detract from its stylish and sporty looks. Leo offers the freedom and confidence for you to enjoy essential daily outings and leisure excursions. With high standards of design and safety engineering, the Leo undoubtedly sets a new market standard. Available in 3 wheeled or 4 wheeled options.

### Orion – Medium/Large scooter

With a focus on safety and reliability, the Invacare® Orion is equipped with multiple features to ensure a safe and easy ride. Whether you enjoy a daily trip to the shops or love to travel further afield, the Invacare® Orion gives you freedom of independence.

### Comet – Large scooter

The Invacare® Comet is packed with features that enable a safe, fast and enjoyable drive. Getting out and about couldn't be easier, whether stocking up at the supermarket or challenging its outdoor performance, you can rely on the Comet to get you where you want to go, quickly, in comfort and with peace of mind. Also available in Heavy Duty version.

## Invacare Powered Wheelchairs on the scheme

### Pronto M41

The Invacare® Pronto M41 is a compact, manoeuvrable indoor power chair that also has excellent outdoor driving capabilities. It combines smooth mid-wheel drive and SureStep® suspension with a broad choice of seating options. Its sleek, stylish shrouding ensures the Pronto M41's looks are as engaging as its performance.

### Pronto M41 Modulite

Versatile and compact mobility for everyday use. The Invacare® Pronto M41 Modulite is a sleek and highly versatile indoor power wheelchair. It offers an excellent range of seating options to address complex postural needs providing support and comfort. It is designed to perfectly suit your independent lifestyle – wherever you choose to be.

### Pronto M61

The Pronto M61 features Invacare's Sure Step® technology for smoother driving over lower thresholds. Designed around a compact base, the Pronto M61 provides excellent manoeuvrability especially in confined spaces, and the electric seat riser provides 120 mm of elevation.

### Mirage

The Invacare® Mirage is a transportable power wheelchair that provides comfort and confidence. Its compact design and excellent manoeuvrability gives the Mirage an unrivalled performance both indoors and out. The Mirage is a combination of aesthetics and the latest design principles that offer you a modern look as well as a safe and stable drive.

### Kite

Invacare® Kite is a power wheelchair packed with features! This highly adaptable power chair comes equipped with unique suspension system that guarantees superior driving comfort and traction. Kite is designed for you if you love outdoor activities yet still require a compact chair in your everyday life

## Invacare Powered Wheelchairs on the scheme

### Fox

The Invacare® Fox has been designed to help maximise independence. As well as meeting your practical needs, Fox is also very comfortable, great looking and safe. With its highly efficient motors and easy to use controls, it is ideal if you want to travel a distance every day. It offers a sleek compact wheelbase for excellent manoeuvrability in tight spaces.

### Spectra XTR2

Invacare's Spectra XTR2 has been developed to combine powerful driving performance with comfort. High torque motors and a unique suspension design provide a smooth, easier ride. Modulite™ seating offers unrivalled flexibility and adjustments providing a solution for many postural needs.

### TDX SP2

The Invacare® TDX® SP2 boasts unrivalled durability and ultimate performance. Great manoeuvrability indoors and out, with a wide choice of seating options for optimum comfort and support, the TDX SP2 is the powerchair for individuals who need full functionality, but do not want to compromise on style.

### TDX SP2 Narrow Base

The Invacare® TDX® SP2 Narrow Base is the ultimate combination of comfortable seating with a compact, stylish, high performance driving base. Whether effortlessly managing tight indoor environments or confidently performing in challenging, outdoor terrain, the TDX SP2 NB is the centre wheel drive that offers the Total Driving eXperience.

### Esprit Action 4NG

A compact and lightweight power wheelchair if you like to get about quickly and easily. Its tool free, removable wheels and compact battery pack make it ideal for transporting. It has lightweight wheels and a narrow overall width – so you can manoeuvre around the tightest of spaces. It provides all the advantages of driving a power wheelchair indoor and outdoor, without the size and bulk of an average power wheelchair.

## What's the next step?

- Select your Product from our comprehensive range

### *Why Choose our products?*
