Invacare® **iPortal2®**

NEW

iPortal 2: media and mobility that keeps you connected

iPortal2 is our most advanced wheelchair media-connectivity system yet. This pioneering solution allows wheelchair users the ability to connect with personal computers and portable computing devices from their power wheelchair joystick or special input device.

The new *iPortal2* module includes:
- A real-time display for a wheelchair's settings and battery status.
- Bluetooth® pairing to PC and iOS devices.
- Simple switching between devices.

Features and Options

Dashboard App

The **iPortal2** Dashboard Application displays wheelchair information in real-time using Bluetooth® technology to connect with the wheelchair's operating system. It displays the speed range and seat adjustment indicators as well as a large battery status gauge. When connected to the iPhone 3GS (or later versions) users can also access a compass heading.

Accessibility

iPortal2's ground-breaking functionality makes a significant difference to users' lives - accessibility. It's a pioneering solution that gives wheelchair users the ability to control an iPhone, iPod Touch or iPad via their wheelchair joystick or special input device. Apple's Voiceover and Assistive Touch enables wheelchair users to control the Apple device. Surfing the net, making calls, playing music is now easy and accessible without the need to touch the Apple device.

Mouse Mover

With the Mouse Mover feature enabled with a simple Bluetooth pairing, the wheelchair's joystick can be used as a computer mouse pointer, allowing the user to navigate and interact with their PC or laptop.
