

Heavy Duty Joystick (ASL133)

The heavy duty joystick is fully reinforced offering the most durable option within the Invacare range! Thanks to its unique shape and size, it is easy to locate and handle with a non-slip texture, making it easier to grip in your hand. The HD joystick includes a built-in button on the top to select through different functions of the chair. The proportional reinforced joystick is particularly suitable to those with high muscle tone.

Features and options

Tray support

Can be mounted on a tray, in front of armrest or in central position.

Support for central mounting

Mounted option

Available as an option mounted on the Invacare range of power wheelchairs equipped with LiNX electronics.
