for people with low levels of mobility

Yes, you can.®

What is onesolution?

It's about changing a mindset and ensuring that when we think about a wheelchair, we also think about the seating, the back support and other positioning options.

It's about taking in to account the person's needs and how that may change over time to ensure people are as functional as they can be. By preventing postural deformities and pressure injuries we can assist people to live the most independent, active and enjoyable lives as possible, without disruption.

We offer a wide portfolio of mobility and seating options. In this brochure we are featuring the most advanced seating combinations as recommended by leading therapists and experts. Now you can browse the options and arrange to order and deliver these combinations as one complete solution.

Clematis[®] Pro

Azalea[®]

Dahlia[®]

rea

Designed for comfort

We designed our passive wheelchair range with comfort primarily in mind so that people with long term mobility issues can be as supported as possible. People with long term mobility issues can spend great lengths of time resting due to discomfort, postural conditions and pressure injuries. This is why Rea wheelchairs are designed with our unique DSS technology offering highly supportive tilt-in-space configurations that follow the pivot points of the body.

Recommended back supports

Rigid back supports are key in helping to prevent postural deformities. They give greater functionality than a standard canvas.

matrx[®] E2

Award-winning backrest, offering superior postural support, pressure relief and exceptional microclimate control.

matrx[®] E2 Deep

The Matrx E2 but with **extra lateral depth** for maximum trunk support.

Recommended pelvic supports

Core stability is fundamental for optimising function and mobility. A posture belt secures the pelvis for more stability and enhances upper body control.

BP Bodypoint[®] 2-point belt

High-quality pelvic positioning belts with a durable and comfortable construction offers superb secondary postural support with a range of buckle options.

Recommended headrests

We offer a range of highly configurable headrests, designed for mild to complex postural needs. The range also features flexible head pad options that contour to the heads natural shape.

matrx[®] LOXX™

Simple and intuitive. With 4 adjustment points, the configurable hardware is a solution suitable for a wide range of needs.

matrx[®] ELAN®

Compact and lightweight. With 6 adjustment points, it's our most adjustable hardware yet, offering a solution for the widest range of applications.

Recommended cushions

We offer a wide range of wheelchair cushions for comfort, pressure relief and positioning, designed for people with moderate levels of mobility.

matrx[®] CONTOUR VISCO^{NG}

100% viscoelastic contoured foam offers efficient pressure distribution for people at medium to high risk of skin breakdown whilst promoting stability.

VICAIR[®] ADJUSTER 02

Machine washable air cushion with SmartCell™ technology for improved positioning. The design helps to prevent pressure injuries and addresses shear.

matrx[®] LIBRA

Award-winning modular cushion offers exceptional pressure relief for people at very high risk of skin breakdown and maximum postural stability.

Other options

Secondary supports can further enhance postural positioning, enabling people to be as functional as possible.

BP Bodypoint[®] Pivotfit harness

High quality dynamic shoulder harness for additional trunk support

BP Bodypoint[®] Ankle huggers[®]

Generously padded for gentle positioning of the ankle and foot

onesolution.

oneorder.

A simplified ordering process allows you to order your complete solution in one order. With an increased product range to choose from and more configuration possibilities, ordering your wheelchair, seating systems and any other positioning options has never been easier.

onedelivery.

Now delivered as one with mounting hardware and pelvic positioning belts pre-installed ensuring your complete solution is ready for use to make life's experiences possible.
