INVACARE® TOP END® Force RX™

The *Invacare* ***Top End Force RX*** with adjustable carbon fibre back or an integrated welded back is the latest competitive handcycle in the *Invacare* ***Top End Force Series***. Lightweight and aerodynamic are the two main characteristics of this handcycle.

In its adjustable configuration, the ***Top End Force RX*** offers a custom reclined frame with adjustable feather weight carbon fibre back. The 7005 heat treated frame is fabricated with slick one piece side frames, plus there are multiple enhancements to allow a more reclined position without interference.

The ***Top End Force RX*** with an integrated welded back which is ultra-light and super stiff still gives you the choice in fork style and components. This handcycle is a completely customized racing machine!

FEATURES AND OPTIONS

Adjustable carbon fibre with bolt-on adjustable headrest.

3 different fork styles are available: fixed length with vertical height adjustment (standard), fixed height or both diagonal and vertical adjustments.

SRAM® X9 30 speed drive train, trigger shifter and brake mounted on the right handpedal is standard.

Get closer to the front wheel with the super strong redesigned curved monocoque front triangle.

Heinz Frei - Switzerland
